

KBR-1500

Calibration Procedure

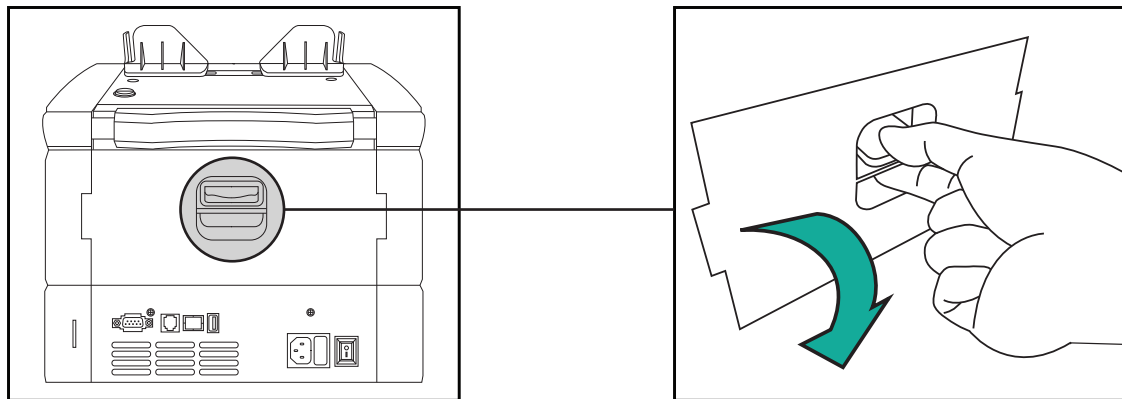

The contact image sensor (CIS) of the unit is calibrated properly from the factory. With regular, basic use, the sensor's sensitivity decreases which can lead to IMAGE errors. To resolve this issue, the unit can be re-calibrated using the white calibration paper that came with the unit.

Please follow the steps below to calibrate the sensor:

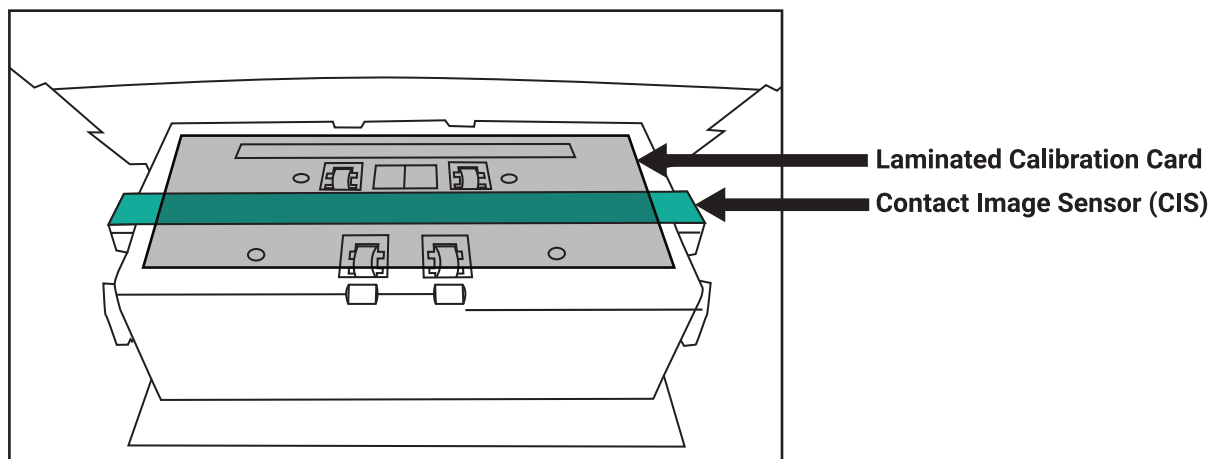

1. Ensure the machine is turned ON.
2. On the control panel, press the "ADD" and "+1/+10" button at the same time. A calibration screen will display with a message instructing you to "Open the Cover and put in the calibration paper".

3. Then locate the latch on the back of the machine and open the back door by pinching the latch and pulling out and downward.

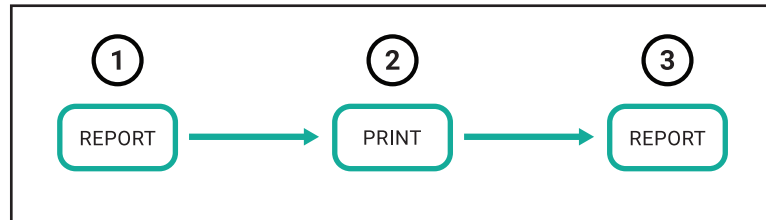

4. Put the provided laminated calibration card inside on the back door of the unit so it covers the inside Contact Image Sensor (CIS) line.

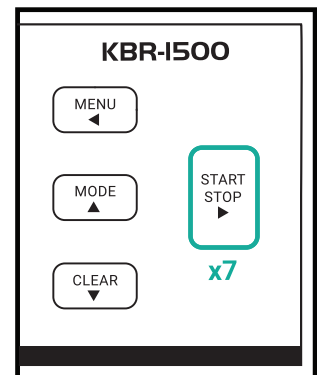

KBR-1500

Calibration Procedure

- Carefully proceed to close the back door with the calibration card inside the machine.
- Once the back door is closed, turn the machine back around so you are facing the control panel of the KBR-1500.
- Press the buttons in the following order “REPORT” “PRINT” “REPORT”. Once the buttons are pressed in that order, UV line will be highlighted on the display.

- Next, press the “START/STOP” Button 7 times to initiate the calibration process. Once the buttons are pressed 7 times, calibration will begin and the calibration screen will display a message “CIS check wait”.
- A message of successful adjustment will show “CIS check ok.” If a message of “CIS check fail” is shown, try re-adjusting the calibration card in the machine for better placement in front of the CIS sensor and following steps 5- 8 again.
- Once the successful message is shown, remove the calibration card from inside the machine.
- Reset the machine by turning it off, then on.
- The CIS calibration is done.

If, after calibrating the unit, this does not resolve the issue, please see the support section on the Kolibri USA website at www.kolibriusa.com, or contact Kolibri Support at support@kolibriusa.com for further troubleshooting.
